Interactive Polling Made Easy

with TurningPoint®

TurningPoint is an easy-to-use desktop polling application tied to a cloud-based interface. Available for Mac or PC, the dashboard offers a convenient platform for instant management of polling, content, sessions and reports.

PowerPoint Polling

Deliver interactive PowerPoint presentations using seamlessly created polling slides.

Anywhere Polling

Poll over top of web pages, videos, documents or any application using a floating toolbar.

Self-Paced Polling

Deliver assessments, evaluations and surveys that require participants to work at their own pace.

Web Polling

Stand-alone polling environment allows you to create interactive questions online to deliver to mobile devices.
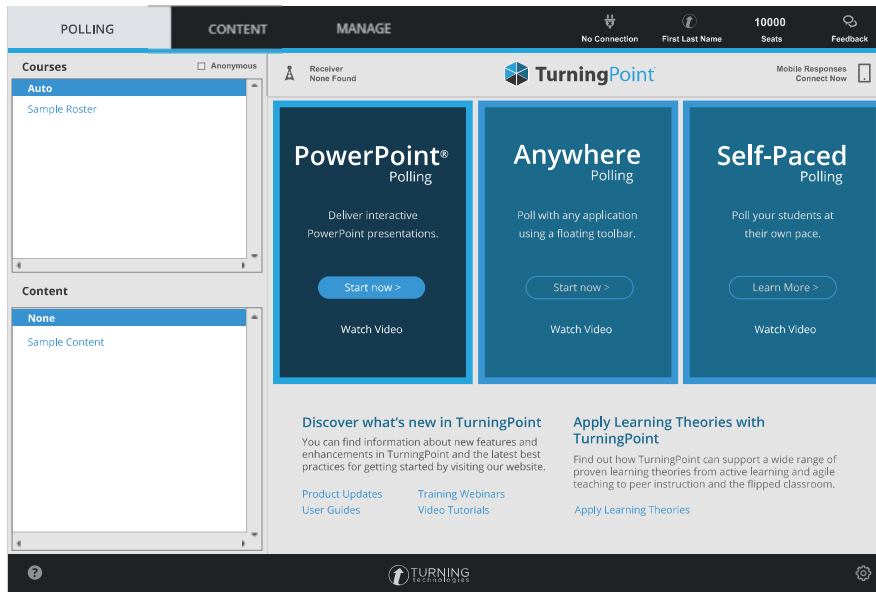

Response Devices

A variety of high-quality, durable response devices are available to meet the needs of any learning environment.

Response Options

Participants can respond with response devices and mobile devices together in the same environment.

Mobile Option

Participants are able to respond to polling questions with any web-enabled device through an app or web browser.

**TURNING** technologies

PowerPoint Polling

TurningPoint's direct integration with PowerPoint allows for seamless polling with new or existing presentations. Polling slides are easily inserted into presentations and allow customization of question types, graphs and more. As the presentation is running, the polling slides work in sync with the rest of the presentation. Open and close polling with a click of a button as you watch responses collect. When polling is closed, the results appear in charts to visually represent responses.

Limitless Options

Create competitions with team scoring and leader boards

Understand your audience through demographic data slicing

Revisit questions and view progress with comparative linking

Use conditional branching to skip sections the audience understands

Allow your audience to rank options and instantly see the results

Know how your audience is answering from one moment to the next

Insert a countdown timer to close polling after a specified amount of time

Anywhere Polling

TurningPoint's Anywhere Polling option turns all types of learning material into interactive experiences. A toolbar floats over top of applications, web pages, videos, PDFs and more to instantly collect responses on-the-fly or with a question list. Easily open and close polling and view responses in a chart.

Beneficial in All Environments

Drag and move the floating toolbar anywhere on your screen

Create and load question lists in advance, or ask questions on-the-fly

Charts are viewable in a new window and update in real-time

View who has and hasn't responded with the response grid

Self-Paced Polling

The Self-Paced Polling option in TurningPoint allows presenters to administer assessments, evaluations and surveys. Participants can proceed at their own pace and can revisit questions as needed. Identify the effectiveness of assessments by comparing pre- and post-tests or analyzing surveys. Answers are instantly collected and graded with the ability to export in customizable formats.
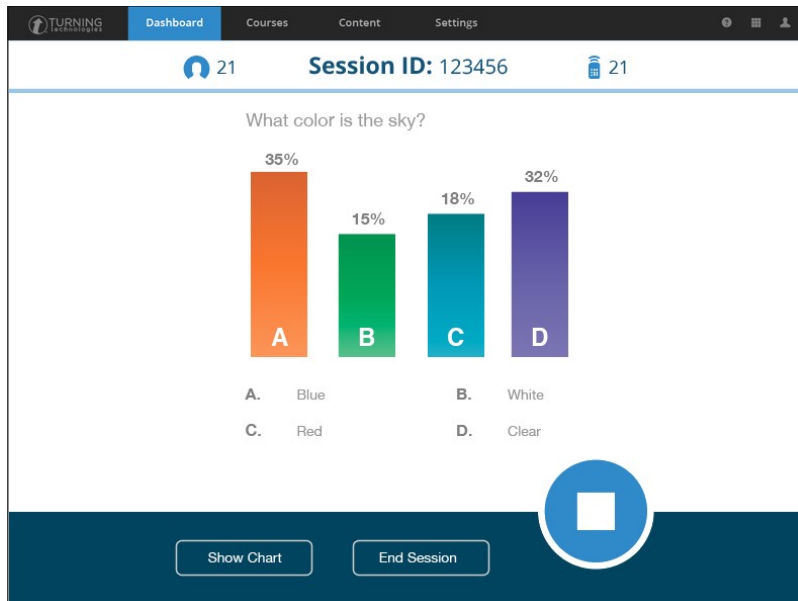

Flexible

A variety of question types allow for detailed data

Ask up to 250 questions to understand participants' knowledge

Deliver up to 20 different test versions

Set a specific amount of time or an exact time for assessment completion

Web Polling

Web Polling is a stand-alone app designed to create and deliver interactive questions online through a computer, tablet or even a smartphone. Without the need of a desktop app, Web Polling is a simple and easy-to-use option ideal for users looking to engage all learners and deliver formative assessments. Ask questions on-the-fly to prompt discussion or include questions at any time during lectures to check comprehension. Questions and results appear on students' mobile devices to remove any learning curve.

Simple and Delightful

Reserve a session to utilize for a day, semester or as along as needed

Create and ask multiple choice questions

Deliver questions to your students' mobile devices

View graphs that instantly appear to assess understanding

Content and data is exclusive to other TurningPoint polling environments
